Claims 1-12 are pending in this application

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-10 and 12 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 and 11-12 of copending Application No. US. 10/587,763. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims the copending application No. 10/587,763, teach and disclose similar agent for coloring hair comprising thiazolium dye of a formula (I) and wherein the agent also comprises oxidation dyes, direct dyes and oxidants in the claimed pH range as claimed in claims 1-10 and 12 (see claims 1-9 and 11-12 of the copending application No. 10/587,763). Therefore, this is an obvious formulation.

Art Unit: 1796

Although, the claims of the copending application No. 10/587,763, teach and disclose agent for dyeing hair comprising similar dyeing ingredients to those claimed, they are not identical to the instant claims, because the claims of the copending application No. 10/587,763, require an oxidant in the coloring agent while the instant claims do not require oxidant in the coloring agent. Therefore, the conflicting claims are not identical.

However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to be motivated to formulate such a composition to arrive at the claimed invention because the claims of the copending application No. 10/587,763, teach and disclose similar agent for coloring hair that comprises similar thiazolium compounds as those claimed, and, thus, a person of the ordinary skill in the art would expect such a composition to have similar properties to those claimed, absent unexpected results.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hohmann et al. (US 4,046,752).

Hohmann et al. (US' 752) teaches a dye compound having a formula identical to the claimed formula (I) as claimed in claims 1-5 and 12 (see col. 15, the lower formula), when in the

Art Unit: 1796

claimed formula (I), R1 and R4 are alkyl radicals, R2, R3, R5 and R6 are hydrogen atoms and A is an anion of monomethyl sulfate. Hohmann et al. teaches all the limitations of the instant claims. Hence, Hohmann et al. anticipates the claims.

4 Claims 1-5 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Neeb et al. (US 4,269,768).

Neeb et al. (US' 768) teaches a dye compound having a formula identical to the claimed formula (I) as claimed in claims 1-5 and 12 (see col. 6, the formula), when in the claimed formula (I), R1 and R4 are alkyl radicals, R2, R3, R5 and R6 are hydrogen atoms and A is the chloride anion. Neeb et al. teaches all the limitations of the instant claims. Hence, Neeb et al. anticipates the claims.

Allowable Subject Matter

5 Claim 11 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record do not teach or disclose the limitations of this claim.
